CUARTO TRIMESTRE CURSO 2022-2023: DEL 26 DE SEPTIEMBRE AL 2 DE DICIEMBRE DE 2022

| Código y título de asignatura | Tema | Día | Hora inicio | Hora fin | Profesor/es |
|--|---|-----------|-------------|----------|----------------------------|
| 101126 - Microeconomía | This course is concerned with econometric techniques for the analysis of micro data. Topics in both theoretical and applied econometrics are covered, with a view to illustrate the interaction between models, data and methods. | Miércoles | 15:00 | 16:30 | Dmitry Arkhangelsky |
| | | Viernes | 9:30 | 13:00 | |
| 101134 - Macroeconomía cuantitativa | This course introduces the techniques of modern quantitative macroeconomics to study economies with (a) household heterogeneity, with a special focus on the life cycle dimension, and/or firm heterogeneity, with a special focus on firm dynamics. One important aspect of the course is the emphasis on learning how to solve these economies in the computer. To this end, there is a sequence of problem sets that will guide you through the steps to solve the canonical models of Aiyagari (1994) and Huggett (1996) for the household heterogeneity part, and Hopenhayn and Rogerson (1993) for the firm heterogeneity part. | Lunes | 9:30 | 13:00 | Josep Pijoan-Mas |
| | | Jueves | 15:00 | 16:30 | |
| 101136 - Temas de economía empírica | Understand the economic approach to studying risky health behaviors such as drug use, analyze the policies that affect risky health behaviors, transition from being a consumer of research to being a producer of research through the writing of a short research paper and understand the quasi-experimental approach to doing applied research, its limitations and its strengths. | Martes | 15:00 | 16:30 | Daniel Rees y Yarine Fawaz |
| | | Jueves | 9:30 | 13:00 | |
| 101129- Economía bancaria | This course focuses on understanding the role of banks in the markets for credit and liquidity. Starting with the industrial organization approach to banks, it covers contributions to financial intermediation theory based on information economics, as well as the analysis of the foundations and main tools for the micro- and macro-prudential regulation of banks. | Lunes | 15:00 | 16:30 | Javier Suárez |
| | | Martes | 9:30 | 13:00 | |
| 101122 - Economía laboral | This course is an introduction to various topics in labor economics. We will start by discussing models of labor supply and labor demand, and the determinants of the market equilibrium. We will then analyse imperfections in the labor market, market failures, and inequality – all potential reasons for public policy intervention. We will conclude by introducing methods for the evaluation of public policies. Throughout the course we will combine theory with empirical evidence. | Miércoles | 9:30 | 13:00 | Tom Zohar |
| | | Viernes | 15:00 | 16:30 | |
| 101141 - Seminario de Política Económica | The purpose of this workshop is to discuss important economic policy issues using the tools provided in the Master courses. The focus is not just on the issues themselves but on economic policy angles related to them. Each session will consist of two paired presentations and, for some of them, discussions, based on the recommended readings. The readings highlight different aspects of the topic at hand. A general discussion will take place during and after the presentations, in which all students are expected to participate. | Miércoles | 17:00 | 19:00 | Sanuel Bentolila |
